WRITE-UP

Implement Spring Security with Authentication

DESCRIPTION

Project objective:-

As a developer, build an Authentication Provider in Spring Security.

Problem statement:-

You have been assigned a task by the team to add more flexibility rather than using the standard scenario in building Spring Security.

Following are used:-

- ● Node.js

- ● Jenkins

- ● Angular Application

Following requirements are met:-

- ● A few of the source code should be tracked on GitHub repositories. You need to document the tracked files which are ignored during the final push to the GitHub repository.

- ● The submission of your GitHub repository link is mandatory. In order to track your task, you need to share the link of the repository in the document.

- ● The step-by-step process involved in completing this task should be documented.
